DEPARTMENT OF HISTORY

PROGRAMME SPECIFIC OUTCOME (PSOs) AND COURSE OUTCOMES (COS)

UNDER CBCS

NAME OF THE PROGRAM: BA in History (Pass)

DURATION OF THE PROGRAM: 3 years/6 semester

DESIGN AND IMPLEMENTATION: Assam University, Silchar

STARTED FROM THE ACADEMIC SESSION: 2018-2019

PROGRAMME SPECIFIC OUTCOME (PSOs) --

- Being a subject of social science, History has its own value in society and human life. It helps the students to develop their ethical and social value and gather knowledge about the tradition and culture of our country and contribute to the society through their critical thinking.
- After completion of the three years Degree course with History. Students are expected to think
 and argue critically and express it in their own words.
- The students would be well versed and acquainted with development of historical data and facts.
- The study of History explores the relationship and interconnection of the present with the past.
- On the completion of the course the students are expected to spread their ideas and knowledge to the future generation.
- Students are expected to have a sound judgement on historical data and evidence and critically analyse the same.
- The study enhance the skill of picking up important information from different sources, analyse them and exploring the truth.
- Students will be aware of contemporary challenges and threats to the society like violation of human rights, superstitious beliefs, gender inequality etc.
- The study increases the interest to know the local participation in the process of change and development.
- The study aware the students to find out the solution of the problems faced by individuals or community and make the world a better place to live in.

SI No. COURSE CODE COURSE DESCRIPTION		COURSE DESCRIPTION	COURSE OUTCOME		
1	HISGEC/DSC101T/ GE-501T	History of India from the Earliest times up to 300CE.	The objective of the paper is to analyse the various source materials for the reconstruction of Ancient Indian History. The paper intends to acquaint the students about the process of evolution of Indian culture, society and politics through which human societies have evolved to their present stage of development. Also students know about the rise of Buddhism and Jainism.		
2	HISGEC/DSC-201T/ GE-601T	History of India from C.300 to 1206	The paper tries to highlight the political and cultural development in India under the Kushanas, the Guptas, the Vardhanas, the Palas and the Rashtrakutas. The paper intends to acquaint the people with the State formation and cultural developments in South India under Cholas, Chalukyas and Pallavas. The course also highlights the tremendous progress in the field of art, architecture, painting, literature and science.		
3	HISGEC/DSC-301T	History of India from 1205 to 1707	This course provides an overview of the main trends and developments in India during the Sultanate and Mughals. It acquaints the students to understand the administrative apparatus, society, economy and culture of India in premodern period. The emergence of Maratha power has also been discussed.		
4	SEC-301T	Archaeology and Museology	This course provides the basic idea and knowledge about Archaeology and Museology. This course planned to provide professional knowledge in the field of Museology. It equips students with theoretical as well as practical knowledge of conservation and preservation.		
5	HISGEC/DSC-401	History of India from 1707 to 1950	The paper tries to highlight the major factors that led to the establishment and consolidation of the British rule in India and their forms of exploitation. This period also witnessed the socioreligious movement and the reform movement in Indian societies. Man like Raja Ram Mohan Roy, Ishwar Chandra Vidyasagar fought against the evipractices prevailed in the society. The paper also acquaints the students about the process of the growth of nationalist movement which ultimately led to end the British rule.		

6	5FC-401T	Evolution of Indian culture	This course focusses in the various form of popular cultural practices, various folk songs and music. The course help students to know about the eminent personalities like Pandit Ravi Shankar, Ustad Bismillah Khan, Pandit Birju Maharaj and Dr. Bhupen Hazarika and their contribution to Indian culture. Students also gained knowledge about India's first Nobel laureates Rabindranath Tagore and his Visva Bharati.
7	HISDSE-501T	History of Europe (1789-1914)	The paper will help the students to know about the French revolution, its effects in different parts of Europe and the political turmoil followed by it. The course highlights the rise of dictatorship in various parts of the world and the secret alliances formed between different countries. Students also acquaint knowledge on First world war and its devastating effect on humanity and world.
8	SEC- 501T	Historical Tourism in India	The course intend to develop tourism, help to preserve Indian heritage and culture and projecting the same to the world through which people can employed themselves. Through this course students are encouraged to explore various historical places of their locality and project them before the world. It helps students to know about the growing opportunity of tourism industry.
9	HISDSE-601T	Modern World(1914-1961)	The course aim at acquainting the students with the development in the world politics and the lormation of league of nations for the maintaining the world peace. The course highlights the rise of dictatorship in various parts of the world. The course focuses on the causes and effects of World War II and formation of UNO. This paper familiarizing the students about the progress of Cold War and Non- Aligned movement.
10	SEC-601T	History of Tea Industry In Assam	The objective of this paper is to give a general outline of the growth and development of Tea industry in Assam under British rule. The course also highlights the various labour unrest in different plantation areas of Assam.

DEPARTMENT OF ECONOMICS

Program outcome (PO), Program specific outcomes (PSO), Course Outcome (CO) Name of the Programme: B.A. Economics (Core and General)

Economics is a social science. It deals with human behaviour as a relationship between unlimited wants and limited resources having alternative uses in the ordinary business of life. It is a unique discipline that requires understanding of Mathematics, Statistics, Commerce, PoliticalScience, History, philosophy, Environmental science, Law, Management etc. Thus knowledge in economics improves the rationality of learners and also helps to attain maximum benefit with minimum resources.

Program Outcome (PO):

Study of Economics enables the learners to understand people, businesses, markets, financial institutions and the economy of a nation. They could respond better to the threats and opportunities that emerge around when things change. It helps them to be involved in the process of economic development. Finally, to ensure sound knowledge of the subject as prescribed by the Assam University.

Program Specific Outcome (PSO):

It enables students to understand the economic conditions of the country. Students could also predict the future course of action plan for growth and development through their knowledge in plans and programmes introduced by the governments and other agencies. They will be equipped with tools (like Data analysis, understanding of budget making, entrepreneurship) and resources to resolve the burning problems like unemployment, poverty and mobilization of resources in the country in a sustained manner.

BA in Economics Discipline Specific Core (DSC) and Core Course (CC) Outcome:

Microeconomics: This course is designed to equip the students to understand the demand and supply side behaviour of human beings as a consumer as well as a

producer. It also raises the rationality of learners to dichotomise the positive and normalive aspects in our ordinary day to day life.

Macroeconomics: This course is designed to provide knowledge regarding the economic systems and aggregate behaviour of market demand and supply. This also enables us to understand the measurement and determination of GDP (National Income), full employment, price stability (measures to control inflation- deflation), and maintaining BoP in a closed and open economy.

Money and Banking: This course attempts to understand the monetary economy of a nation. It provides knowledge in the in depth concepts of monetary economies like money and its measures, impact of rise and fall in value of money, theories of money, banking and its policies to control credit and international financial institutions like IMF, World Bank etc.

Public Finance: It is designed to enable learners to know the role of public authorities in raising revenue (tax & non-tax) and its spending for the welfare of the masses.

Economic Development and policy in India: This course is designed to make learners understand the economic functioning and conditions of our country in the context of the agricultural, industrial and service sector. It also enables us to understand the economy's growth and development as compared to the rest of the countries in different continents of the world in context of demography and capital formation.

History of Economic thought: It is designed to provide knowledge about the systematic development of economic theories beginning from pre-modern and modern era and different schools of thought.

Environmental economics: In today's world, environmental pollution is a challenge to sustain the growth of an economy and its future. Thus the study of the course helps learners to equip themselves with the tools and policies to control pollution to achieve sustainable economic growth and development.

Mathematics for Economists: This course enables students to define all the relevant assumptions, conditions, and causal structures of economic theories in

mathematical terms. It allows students to use mathematical tools such as algebra and calculus to describe economic phenomena and draw precise inferences from their basic assumptions and definitions. Second, it allows to operationalize these theories and inferences so that they can be tested empirically using quantitative data and, if validated, used to produce quantitative predictions about economic matters for the benefit of businesses, investors, and policymakers.

Econometrics

This course enables students to translate abstract economic theories into useful tools for everyday economic policymaking by combining mathematical economics with statistical methods. The objective of econometrics as a whole is to convert qualitative statements—such as "the relationship between two or more variables is positive"—into quantitative statements.

Statistical methods of Economics: Students will understand the basic concepts of descriptive and inferential statistics. It will help students understand situations radically and solve them

Data Analysis Students will learn to identify, compile, interpret and analyse quantitative economic data using econometric methods like mean, median, mode and advanced regression analysis to assess economic relationships.

Every programme & course has its own learning outcomes. Our department is preparing activity plans and displaying them on the departmental notice board. Programme outcomes, course outcomes and their importance are exchanged to Teachers and Students.

DEPARTMENT OF HINDI
NEHRU COLLEGE, PAILAPOOL

DEPARTMENT OF PHILOSOPHY

PROGRAMME SPECIFIC OUTCOMES (PSO) & COURSE OUT (CO)

NAME OF THE PROGRAMME: B.A (CBCS) & FYUG in Philosophy (Pass)

DURATION OF THE PROGRAMME: 3 YEARS & 4 YEARS

DESIGN AND IMPLEMENTATION: ASSAM UNIVERSITY, SILCHAR

INTRODUCTION FROM: 2018-19 & 2023-24 ACADEMIC SESSION

PROGRAMME SPECIFIC OUTCOMES (PSO)

- 1) Inculcate the skill of critical Inquiry which is necessary for philosophical discourse in order to generate the creative thoughts objectively.
- 2) Proficiency in philosophical investigation, ability to explain theories and identify valid argument.
- 3) Equip the students with skillful methodology of philosophy so that they can help themselves to analyze the problem, frame the hypothesis, and authenticate reasoning and to get a suggestive or acceptable conclusion.
- 4) Continue to acquire applicable knowledge and skills appropriate to professional activities and demonstrate highest standard of moral/ethical issues in human society.
- 5) Create awareness to become an enlightened citizen with commitment to deliver one's responsibilities and value to the society.

Semester	Course code	Name of the course	Course outcome
1.	DSC - 101 / GE - 101	Principles of Education	 The course will have the following outcomes- Learners are acquainted with scientific and sound principles and theories of education; aims of education, dimensions of curriculum and teaching; discipline and freedom. Students understand various agencies of education including emerging agencies in this era of information age.
2 nd	DSC - 201 / GE	Foundation o	Students acquire basic

	- 201	educational psychology	 knowledge and understanding on psychological foundation of education. Relationship between psychology and education. Develop basic skills in psychology and their implications in education in solving educational problem. Understand theories of learning. Students are well acquainted with the knowledge of intelligence and creativity.
3 rd	DSC - 301	Theories and ideas of philosophy in education	 Studnets understand the meaning, aims, functions and role of educational philosophy. Relationship between philosophy and education. Learners acquaint with Indian philosophy and Western schools of philosophy and their impact of education. Contributions of great educators.
	SEC - 301	Yoga and Life skill education	 Learners understand the concept of holistic health; need and importance of physical education. Learners acquire various life skils; and are introduced with the philosophical bases of Yoga. Learners are acquainted with the types of yoga and their importance in health and life; learners are motivated to participate in yogic exercises and imbibe art of living skill.
4 ^a	DSC - 401	Education and society	Students are acquainted with nature of society, and its institutions in general and that of Indian society and culture in particular.

			 Understand the sociological foundations of education as well as the influence of social structure on education and vice versa. Students develop an awareness of dynamics of social change and social mobility and their implications in education.
	SEC - 401	Application of ICT in education	 Learners understand to integrate ICT into teaching, learning, administration and evaluation; develop information management; communication and collaborative skills. Designa nd develop and use learning materials in teaching; practise safe, ethical ways of using ICT; use ICT for making classroom processes inclusive. Prepare collaborative project for problem-solving, research using ICT; learning integrating technology tools for teaching learning, material development, and development collaborative network for sharing and learning.
5 th	DSE - 501	History and contemporary system of education in India	 Learners are acquainted with the salient features of education in India in Ancient and Medieval era; development of education in British India; significate developments and reforms of education in Independent India. Learners understand the various stages of education prevalent in India as well as policies and programmes undertaken by various

			controlling authorities in order to ensure quality in education.
	SEC - 501	Application of Teaching- learning skill in classroom	 Learners understand the concept, nature and various skills of teaching-learening process. Develop skill in teaching-learning process in classroom. Develop basic skills in using various teaching devices.
	GE - 501	Principles of Education	 Learners are acquainted with scientific and sound principles and theories of education; aims of education, dimensions of curriculum and teaching; discipline and freedom. Students understand various agencies of education including emerging agencies in this era of information age.
6 th	DSE - 601	Trends and issues in education	 Students acquire adequate knowledge of the emerging issues and trends in education. Understand the issues and problems of adult education, lefelong learning, vocationalisation of education and women education with special reference to Assam. Understand and develop awareness about population education, lifeskill education and inclusive education. Develop basic understanding regarding globalization, sustainable development as well as value, peace and human rights education.
	SEC - 601	Leadership and organizational skill	 Students understand the concept, nature and various skills of leadership. Develop emotional intelligence and inculcate

		communication skills among the learners teaching-learning process in classroom. Develop leadership and group behaviour among the learners. Develop an understanding of motivational and team development strategies.
GE - 601	Foundation of educational psychology	 Students acquire basic knowledge and understanding on psychological foundation of education. Relationship between psychology and education. Develop basic skills in psychology and their implications in education in solving educational problem. Understand theories of learning. Students are well acquainted with the knowledge of intelligence and creativity.
